NOTES:
Custom facility code, card numbering/ID range and laser etched artwork printing available at no added cost. 1326R Clamshell cards come vertically punched. 1346R fobs include reinforced brass eyelets. Slot punching not available for 1386R and 1314R cards.
1. Facility Code – range from 0 to 255, default is 21.
2. Printing – date code and ID range printing. Two types; inkjet (ink is printed on the surface, printing appears black, not permanent/may rub-off overtime) and laser etching (burns the top layer of the card, printing appears gray, permanent marking). "No preference" typically results in the quickest lead time.
3. Laser Etched Artwork – a URL, short sentence or small logo may be etched on most credentials. Send artwork with completed order form or reference your "custom credential number" above if using the same artwork sent to RCI on a previous order. Artwork requirements: one-color .ai or .eps file. Output will be gray.
