

CASE STUDY:

Worked with a yacht fitment company on custom built yachts

THE CHALLENGE(S):

- From the captain's bridge the customer required the ability to secure all openings instantly in rough waters
- Customer was looking for a locking system to fit a variety of different sized and shaped openings
- Required to operate on a 12VDC marine system

THE SOLUTION:

- Provided the 9320 Stand-Alone Proximity Reader pre-programmed to control a large number of 3513 cabinet locks simultaneously.
- The flexibility of the 3513 cabinet lock installation and operation allowed the Customer to use one standard lock for all openings

BENEFITS of SOLUTION IMPLEMENTED:

- The 9320 reader interfaced with the 3513 cabinet locks provided immediate securing and visual status of the locks operation
- Ensuring items remained secure and safe in cabinets and drawers during rough waters
