

**CASE STUDY:**

Worked with an integrator to provide their Customer a means to have better control into the member's lockers.

**THE CHALLENGE(S):**

- Customer wanted provide added value and security to his yearly members
- The locks had to be retrofitted into all existing yearly members lockers
- Power was a concern to the client due to the possibility of exposure to voltage and damage to wiring

**THE SOLUTION:**

- Using the 3590 Lock N' Prox, provided the Customer with an all inclusive access and lock solution.

**BENEFITS of SOLUTION IMPLEMENTED:**

- Using the 3590, the customer was able to provide key fob's to his yearly members to providing them with quick access to their secured locker
- The all-in-one 3590 provided minimal installation time for retrofitting into the lockers.
- One of the key benefits of the 3590, is the battery operated functionality which eliminated the clients concern or power and wiring damage.
